The Trade Showroom

Up the main staircase, turn right.

In this room people would have chosen their tiles to buy from the factory. **Look around.** Choose and draw your two favourite tiles.

Fascinating Fact!

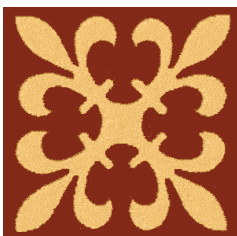

Floor tiles are made to be walked on so they are normally smooth and often unglazed. As wall tiles do not have this restriction they can have raised patterns and be highly decorative.

Touch the tiles on the walls.
Can you tell if they are floor or wall tiles?

Copy an encaustic floor tile.

An encaustic floor tile.

Style Gallery

Left at the top of the staircase

My Favourite Tile

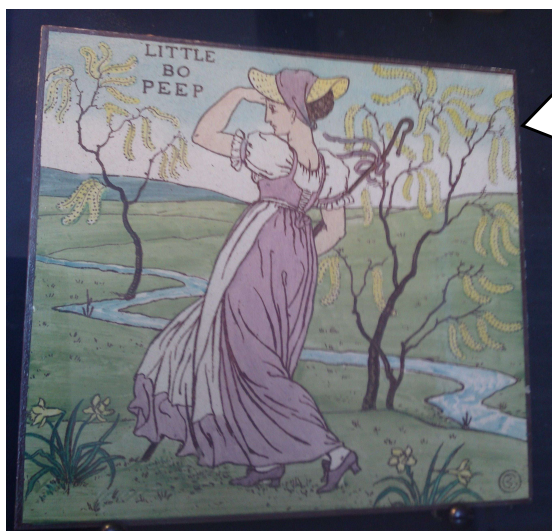

A tile with a flower on it

A tile with an animal on it

A tile I didn't like

Can you find this tile?

Who is the lady?

What is she
looking for?

Tiles everywhere

Continue through the arched doors

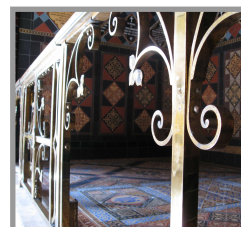

What is the name of the
Underground train station?

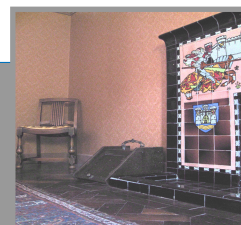

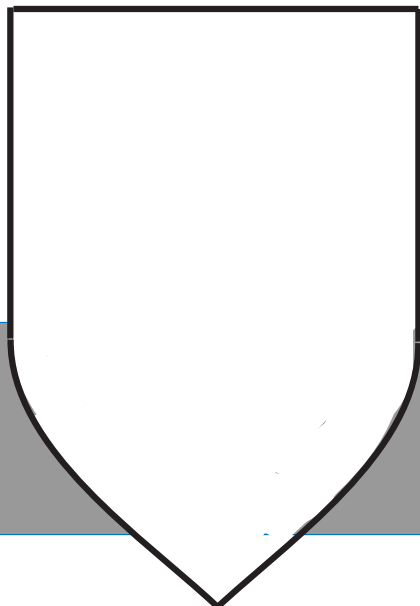

How many pigs are there in
the butchers shop?

Which letters are in the
middle of the church railings?

How many different shields
can you find on the fire
place? Draw one of them.

Can you find this tile mural?

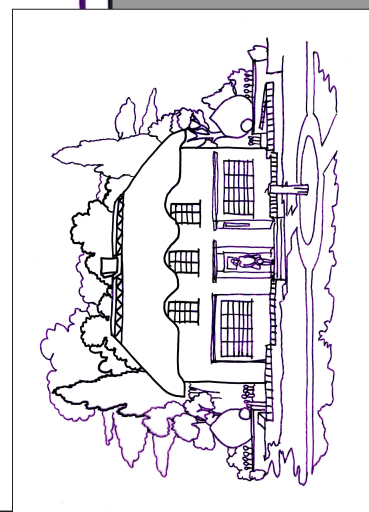

What do you think the children might be saying?

Long gallery

Keep walking around the corner and through the door

Can you find this tile mural? Can you finish the picture?

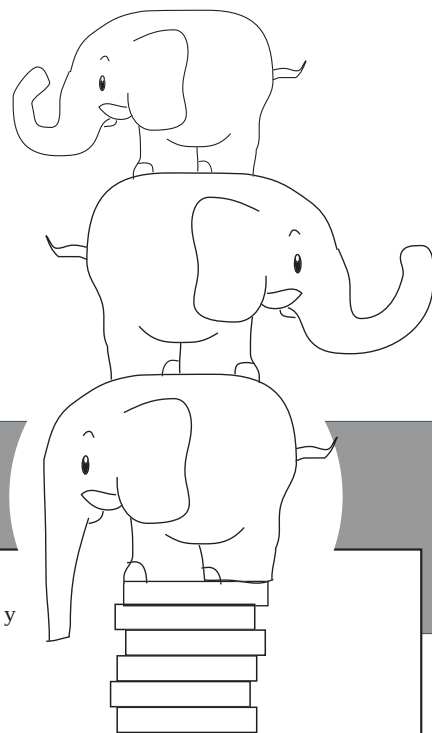

Five Factory Facts

Down the stairs and to the left

What are tiles made from?

**Fascinating
Fact!**

Did you know that the
press pushes the tile
with the weight of
three elephants?

How many tiles can be made
on the press each day?

How much force does the
press use to squeeze the clay
into a tile shape?

-----Tonnes

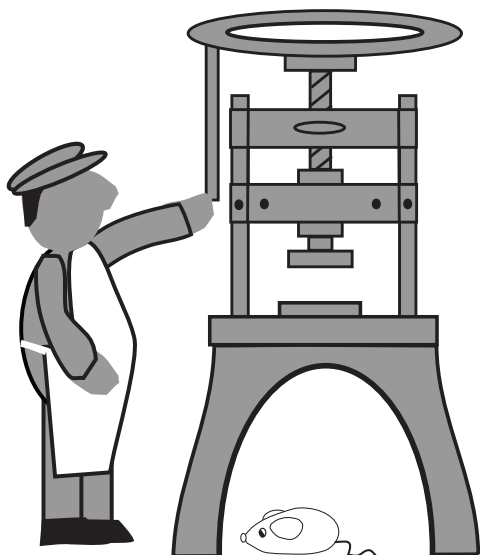

O LISTEN,
What can you hear?

The factory has machines like giant
vacuum cleaners to keep the air
clean and healthy.

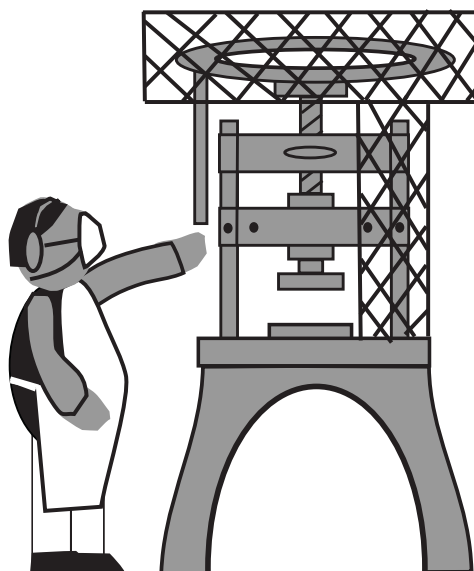

What temperature are the
tiles heated to in the kiln?

-----°C
